

BSB + Partner  
Ingenieure und Planer

BSB + Partner, Consulting Engineers

# Company Background and Profile

## Presentation

BSB + Partner, Consulting Engineers is a leading Swiss engineering and planning company with approximately 120 employees. The headquarters are located in Biberist, near Solothurn.

The company is set up by six joint partners and company owners which all are operative as senior engineers or senior consultants in the firm.

Over the last 60 years the company was able to establish a good reputation beyond the boundaries of Switzerland by developing and applying advanced technology and solutions to complex and demanding projects.

BSB+Partner are the largest engineering company in the Canton of Solothurn and with its professionals has proven expertise in a wide array of integrated solutions.

## Disciplines

- Overall planning and development

- Traffic- and town planning
- Environmental engineering and planning
- Land and resource management
- Civil- and underground engineering
- Construction design engineering
- IT-consulting
- Government relations and consulting
- Surveying and GIS technology
- Geomatics and planning

## Team options

BSB+Partner's multi-disciplined staff includes engineers, consultants, natural scientists, IT-specialists, project managers and business managers. Our project managers are used to form interdisciplinary teams to solve highly complex projects with demanding coordination and planning solutions and take pride in approaching the projects in a target-oriented, efficient and, consequently cost-effective manner.

## Cooperation and partner

In the field of project management BSB+Partner has been able to gain high quality experience in providing the staff function for the project organization of the Lötschberg – Base Line (year century project). The firm had the chance to prove reliable partnership for a most remarkable traffic engineering construction work carried out by the Swiss NEAT Corporation.

We foster close contacts to our clients and their projects which supports and facilitates our identification with the given tasks and provides carefully considered solutions. We are convinced that it is important to create a situation of confidence when dealing with public authorities, other companies and the public (urban and rural).

Our well established associations to competent engineering and consulting partners as well as to universities, scientific research institutes and development corporations help us to constitute cooperation bodies whenever a task requires this.

We are familiar to cooperate and communicate with local, regional and national public authorities in Switzerland and in foreign countries as well as with government representatives and agencies.

## Financial standing

With credit to optimized order processing, BSB+Partner was able to achieve a fee income of Euro 10 millions in 2003.
